HOW ONE CYCLE IS CALCULATED?

Distribution for each cycle that continues is done through automatic re-entry registration.

150%
TOTAL REWARDS
Two receipts of 75%, before re-entry and PIN.

−

100%
RE-ENTRY
Funds participation in the next cycle.

−

10%
ACTIVATION PIN
Activation requirement for the next cycle.

=

40%
MEMBER BALANCE
After re-entry and PIN.

150% − 100% − 10% = 40%

All percentages are based on package value. Applies to continuing cycles; the final cycle is paid separately.

Receipt depends on system rules and contribution flows.

ONE PACKAGE EXAMPLE

VIP2 • PACKAGE VALUE USD 1,000

INITIAL PAYMENT

USD 1,000 Package value	+	**USD 100** Activation fee (10%)	=	**USD 1,100** Total initial payment

USD 1,500 Rewards 150%	-	**USD 1,000** Re-entry 100%	-	**USD 100** PIN 10%	=	**USD 400** Member balance 40%

Two receipts: USD 750 + USD 750 = USD 1,500

This illustrates a continuing cycle with **automatic re-entry.**

USD 400 is the cycle balance after full re-entry and PIN, **not the net profit of the entire package.**

Receipt depends on system rules and contribution flows.

THE FIVE-CYCLE JOURNEY

Complete 5 cycles; the fifth cycle pays 150% and requires an upgrade.

CYCLE 1	CYCLE 2	CYCLE 3	CYCLE 4	CYCLE 5	REWARD
1	2	3	4	5	150% (on the 5th Cycle)

150% REWARD

If you complete a Cycle 5, you will receive a total reward of 150% of your package value.

UPGRADE REQUIRED

After receiving the fifth-cycle reward, the member must upgrade to the next package by adding the balance required.

HOW TO UPGRADE

Add the balance (shortfall) for the new package and a 10% activation fee, including PIN.

UPGRADE EXAMPLE

Current Package **USD 500** › Fifth-Cycle Reward (150%) **= USD 750** › Next Package **USD 1,000** + USD 100 Activation Fee **= USD 1,100** › Top-up **= USD 350**

IMPORTANT:

- The reward on the fifth cycle is 150% of the package value. An upgrade is done by adding the balance according to the package value.
- The activation fee is 10% (including PIN) charged for every new package.
- Cycle completion depends on system rules and contribution flows.
